

GEAR MAX

HIGH END MANUAL TRANSMISSION OIL ADDITIVE

DESCRIPTION

GEAR MAX is a professional transmission oil additive with excellent friction and wear reducing properties. The additive offers strong protection at high pressures and loads.

CHARACTERISTICS

- Smoother and easier shifting.
- Optimal transmission power output.
- Reduces switching noise.
- Wear and friction reduction
- Increased transmission life

APPLICATION

Can be used in all manual, auxiliary and differential gearboxes. Due to the decrease in friction, the additive is not suitable for use in fully automatic or wet clutch drives (DSG, Powershift, etc...).

The capacity (200 ml) is sufficient for 3 litres of oil.

Contents: 12 x 200 ml/carton
